

Surveyor- Please contact Janon to discuss, thank you. 240-230-3428, [janon.chilcoat@cn-bus.com](mailto:janon.chilcoat@cn-bus.com)

Columbia, SC 29210

The South Atlantic Water Science Center - South Carolina (WSC) is one of 48 Water Science Centers in the Water Resources Discipline of the United States Geological Survey (USGS). The Water Science Center's mission is to collect, analyze and disseminate the impartial hydrologic data and information needed to wisely manage water resources for the people of the United States and the State of South Carolina.

We are seeking a qualified licensed Surveyor for a short 9 week project to support the efforts of the USGS.

Responsibilities:

- Perform periodic leveling checks to ensure the gages are accurately set to established gage datum. The level of Gaging Station requires measurement of vertical distance
- Travel all over the state of South Carolina checking on the REAL Time Gaging Stations
- Set foresight to determine elevations
- Determine independent reference marks, and points, outside gages and water surfaces
- Perform collimation testing with a leveling rod
- Document field forms, level notes sheets and reports

Qualifications:

- 3-5 years as a licensed Surveyor in South Carolina (active license required)
- Bachelor's Degree in Land Surveying, Hydrology or related Environmental field
- U.S. Citizenship
- Clear background and clean driving record
- Diving and/or boat operation experience a plus
- Applicants must be able to endure elements of nature in an outdoor environment including biting insects, wasps, hornets, snakes, etc.

Applicants selected will be subject to a U.S. Government security investigation and must meet eligibility requirements for access to classified information.
