

We are seeking **Construction Engineering and Inspection (CEI) Technicians** for our South Carolina team. This individual will be involved with management and construction oversight associated with projects throughout South Carolina working directly with the Project Managers. These projects include, construction management associated with maintenance, rehabilitation and reconstruction of existing projects for SCDOT and other local government agencies.

The ideal applicant will have an understanding of construction manuals, standards and specifications and general construction practices associated with SCDOT projects. This position entails both field and office assignments along with limited travel outside the area.

In this position, you will have the ability to work from any city within South Carolina.

DUTIES

- Under the review and direction of Project Manager, perform field inspection and oversight of construction activities
- Maintain daily reports of inspection work along with detail records of project progress
- Must possess good interpersonal and communication skills
- Able to read and interpret plans, specifications and applicable standards
- Review Contract documents to verify compliance with governmental regulations and conformance with project requirements
- Assist with coordinating materials sampling and testing and verifying sufficient testing has been performed
- Verify accuracy of payment requests and invoicing for completed work
- Experienced with SCDOT construction inspection and procedures
- Ability to coordinate with contractors' staff and effectively communicate with all parties
- Performs standard mathematical calculations
- Able and willing to work day or night shifts and/or flexible schedules as required to support the project requirements
- Able to travel to projects outside the Raleigh area to attend preconstruction meetings, project progress meetings, etc.
- Ability to lift 50lbs
- Additional projects as assigned

REQUIREMENTS

- Associate's Degree in Surveying or Civil Engineering Technology OR
- High School Diploma or GED with related experience in Construction Inspection services for transportation project as described below. Direct field experience as a Contractor or materials-testing technician can substitute for Construction Inspection experience on a case-by-case basis.
- 5+ years' experience in this field or with similar experience.
- Highly motivated and works well with minimal supervision
- Thorough knowledge of SCDOT specifications and standards is preferred, but not required
- Familiarity with Site Manager software is preferred, but not required
- Field testing certifications through SCDOT and/or ACI is preferred, but not required
- Experience with Primavera and other scheduling software preferred, but not required

Desired Certifications include:

- SCDOT and ACI Concrete Field Testing Technician - Grade I
- SCDOT Hot Mix Asphalt (HMA), Level 1 & 2
- SCDOT Earthwork
- SCDOT Foundations

- SCDOT Course Aggregate Level 1
- Erosion and Sediment Control Level 2
- Nuclear Gauge / Troxler
